PRE-ENGINEERING BUILDING SOLUTIONS

Keshar Bhawani Infra Projects Pvt. Ltd. is specialized in design, manufacturing and installation services of Pre-Engineered Buildings and Structural Steel projects. The foundation of the company has been laid by professionals having rich experiences in business development, project management, project execution and customer relationship. The necessity to meet the growing demand of Pre-Engineered Buildings in India and to provide complete end to end solution to clients for their buildings requirements.

We offers complete solutions to the customer enabling them to focus on their organization strategic goals. We undertake a single source responsibility for the project through co-ordination of all the departments :

- ❑ Design & Engineering
- ❑ Manufacturing
- ❑ Project management
- ❑ Logistics
- ❑ Products Design
- ❑ Erection

Pre-Engineered Building is a combination of built-up primary members, secondary members and roofing and wall cladding either single skin or insulated panels. Built-up members and secondary members form a well braced steel skeleton structure which is enveloped by roofing and wall cladding. Thus, we get an air tight, weather proof, energy efficient building to serve the need of customer.

The Pre Engineered Building is an infrastructure which provides enough strength to building as per requirement using various sizes of plates and stiffener manufactured with proper welding and machining techniques. Design and delivering using top of the notch technology leads us to provide on time solutions.

RAILINGS TURNKEY SOLUTIONS

Keshar Bhawani Infra Projects Pvt. Ltd. is a leading provider of pre-engineered railing solutions and systems for Residential, Industrial & Commercial Projects. Specializing in the design, engineering, fabrication, and installation of **Stainless steel, Mild Steel and Glass railings**, we have built a reputation for delivering high-quality, durable products that meet the specific needs of each project.

At Keshar Bhawani Infra Projects Pvt. Ltd., we provide industrial-grade handrail safety systems. Our top priority for every project is safety, especially when dealing with important protective equipment like handrails and Installed in :

- ❑ Residential Buildings
- ❑ Shopping Malls & Cinema
- ❑ Airport, Railways & Bus
- ❑ Industrial Solutions
- ❑ Corporates & Infra
- ❑ Riverside Projects
- ❑ Temples & Monuments

offers you end-to-end solutions. Our team will provide technical assistance in the selection of design-based on-site requirements such as topography, wind-load, etc. We will handle all aspects of the project – Estimation, Design, Production, and Final installation. As a homeowner or an architect – one phone call to Keshar Bhawani Infra Project Pvt. Ltd. is all you need to have a beautiful luxury railing installed at your project

We are Providing Customized Solutions as per drawing and Taking Complete Turnkey Projects across India.

Our goal is to be the company of choice for our valued clients (owners, architects, designers, and contractors) by providing stunning, safe, and sustainable railings at an affordable price. Thus far, we have prided ourselves on leaving our clients not just satisfied but delighted with our products and service. We aim to continue on that same path to ensure an impeccable experience from start to finish with our clients.

Safety First ROAD SIDE BARRIERS

ROAD SIDE BARRIERS TURNKEY SOLUTIONS

Keshar Bhawani Infra Projects Pvt. Ltd. is a Leading Manufacturer and Supply with Installation Service of Road side barriers in India. Road side barrier is also known as Highway Metal W Beam Crash Barriers / W Beam metal Crash Barriers, Road safety Barriers etc. They are designed to redirect the vehicle and have a lower severity than the roadside hazard they protect. We offer Road Side Barriers in a variety of sizes and configurations to suit different road safety requirements in as well as We also provide installation and maintenance services to ensure the barriers are installed correctly and are in good working order in all over India.

We deliver our Road Side Barrier systems as turnkey projects including the actual installation at the particular road or highway.

Our crash barriers are constantly modernised and tested, in order to fulfill the most recent regulations and notices. Besides cars, we don't forget motorcyclists either. Our barriers are designed to meet the highest safety standards and have been tested to ensure they can withstand the impact of a vehicle traveling at high speed in India

Features & Advantage

- ❑ More effective against heavier vehicles.
- ❑ Rigid design needs less space, suitable
- ❑ Reduced damage suffered by vehicles colliding with them.
- ❑ Eliminates headlight dazzling as there are no gaps for light to shine through.
- ❑ Single barrier can perform all functions, including single barrier medians.
- ❑ Smooth, flush surface less likely to cause injury to motorcyclists.

Road Side Barriers are usually made from steel beams or rails. These deflect less than flexible barriers and so they can be located closer to the hazard when space is limited. Depending on the impact these barriers may be able to redirect secondary impacts. All parts of the catch system are protected against corrosion and rust by hot-dip zinc coating in line with EN ISO 1461, which guarantees an extra long Service Life.

HEALTH, SAFETY & ENVIRONMENT GUIDELINES POLICY..

We believe every single employee and individual we work with should have the right to be able to live and work free from the risk of injuries and accidents. The Company's HSE Policy, incorporating approach to safety, management control, accident/incident reporting and investigations, duties and responsibilities of personnel etc., is based on the fundamental premise that all work-related injuries and illnesses are avoidable. The Company believes that the responsibility of ensuring the Health and Safety of employees, contractors and members of public is the highest priority.

We Follow below HSE Policy Guidelines:

- Give Health, Safety & Environment equal status with the company's other business objective and integrate them into all aspects of its workplace.
- Work actively to continuously improve health, safety and Environmental performance.
- Adopt and implement all applicable rules, regulations, legislative requirements to provide and maintain a safe and pollution free working environment
- Mitigate Environmental pollution, health and safety hazards with adequate training and facilities for all employees.
- Encourage personnel to be individually responsible for identifying and eliminating hazards, preventing injury to themselves and others, and report workplace hazards.
- Reduce number of accidents and loss to property.
- Conserve natural resources, minimize waste and control pollution.
- Hold supervisory management accountable for ensuring promoting a safe and healthy workplace and protection of the environment within their areas of responsibility.

QUALITY POLICY..

Quality Is Our Highest Priority. We Learned Long Ago That The Key To Success Is To Provide Customers With A Higher Level Of Quality Than They Expect. Our Organization Is Based On A Culture Of Quality, And It Permeates Every Department, From The Office To The Dock. We Utilize Quality Management Systems That Employ A Number Of Very Effective Tools. Our In-House Laboratory Is Equipped With A Large Range Of The Latest Testing Equipment, Allowing Us To Use Various Procedures To Monitor And Check The Quality Of Our Materials.

The implemented Quality System is based on rules and practices established and agreed with the entire organization, formalized in specific documents and procedures that must guide each company function in carrying out its activities, in order to guarantee the following objectives:

- ❑ Increase the quality of the product/service provided;
- ❑ Cost optimization;
- ❑ Carrying out the process in compliance with current industry regulations and with regard to safety, ethics and ecology;
- ❑ Raise the culture of quality in the operational staff, involving them in the knowledge of the importance of their business;
- ❑ Continuous adaptation of production capacity and flexibility, in order to maintain a high level of product competitiveness and an optimal quality/price ratio.
